Piz-Gloria

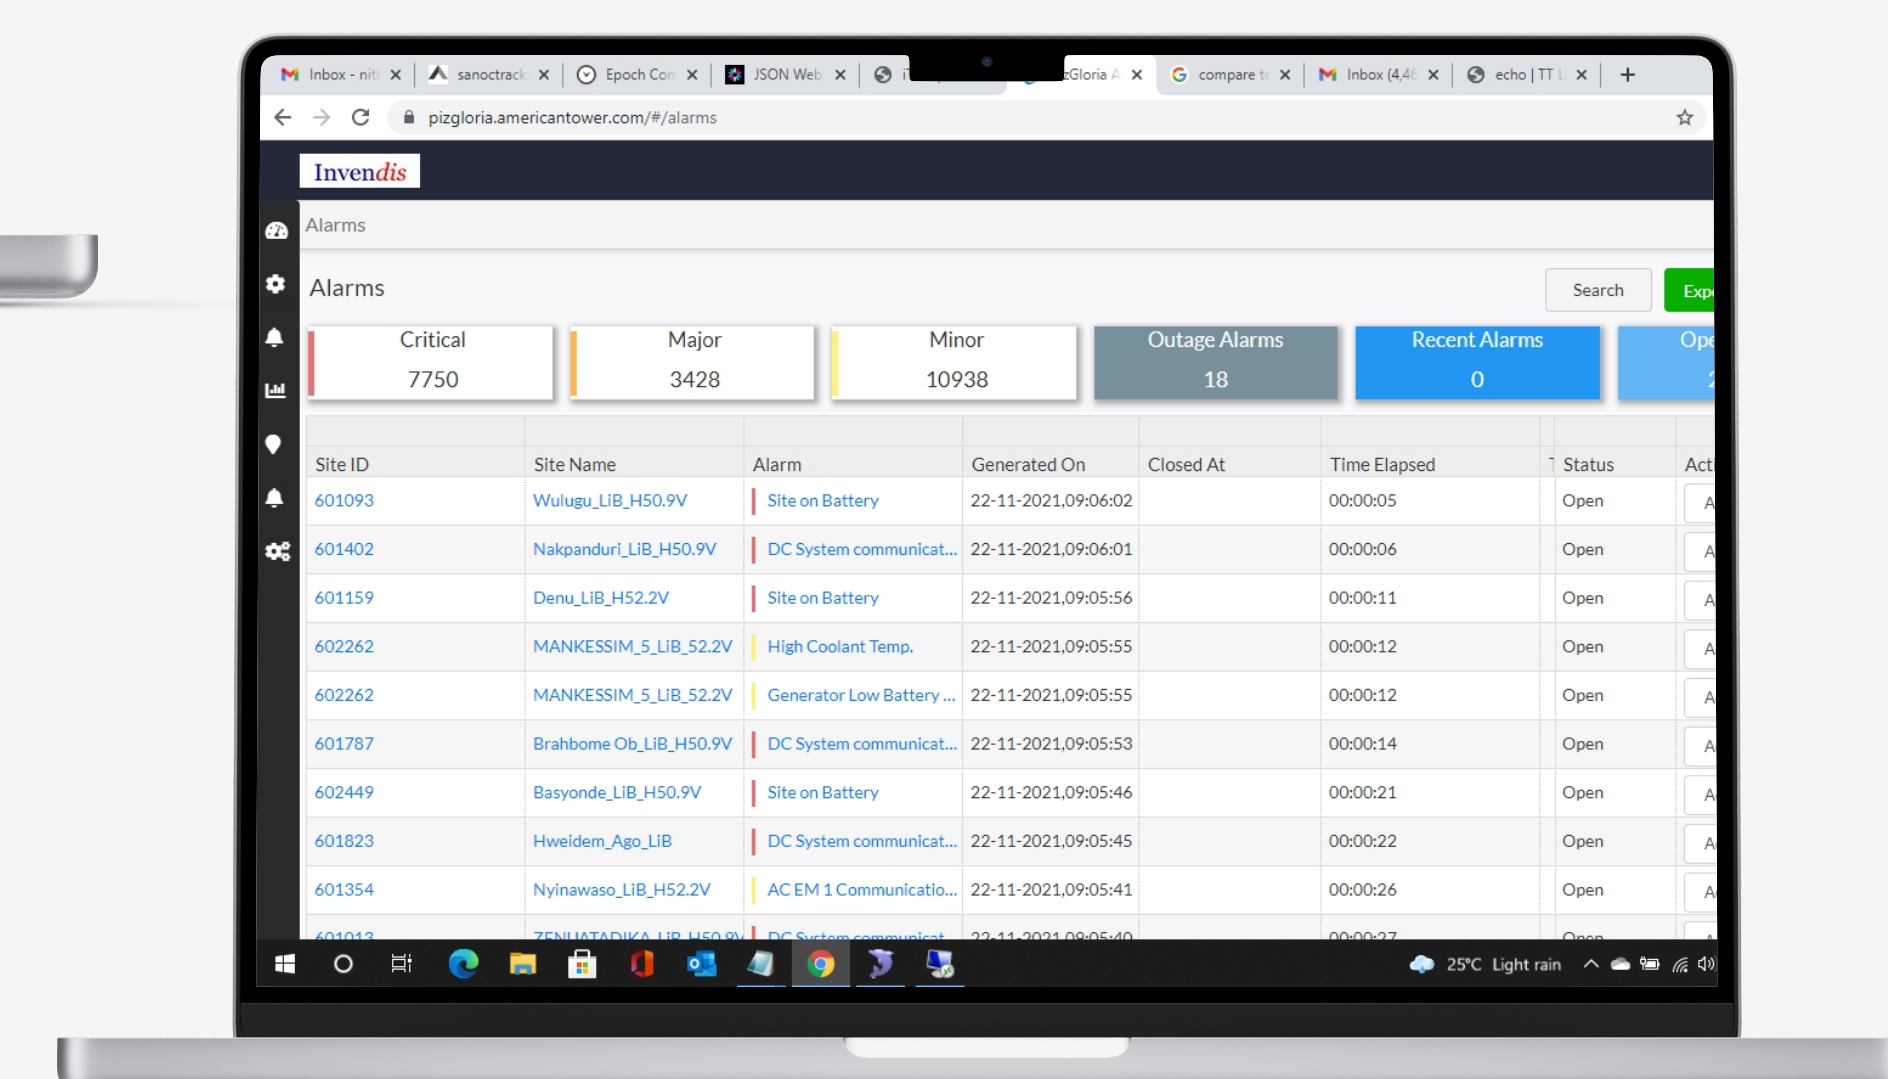

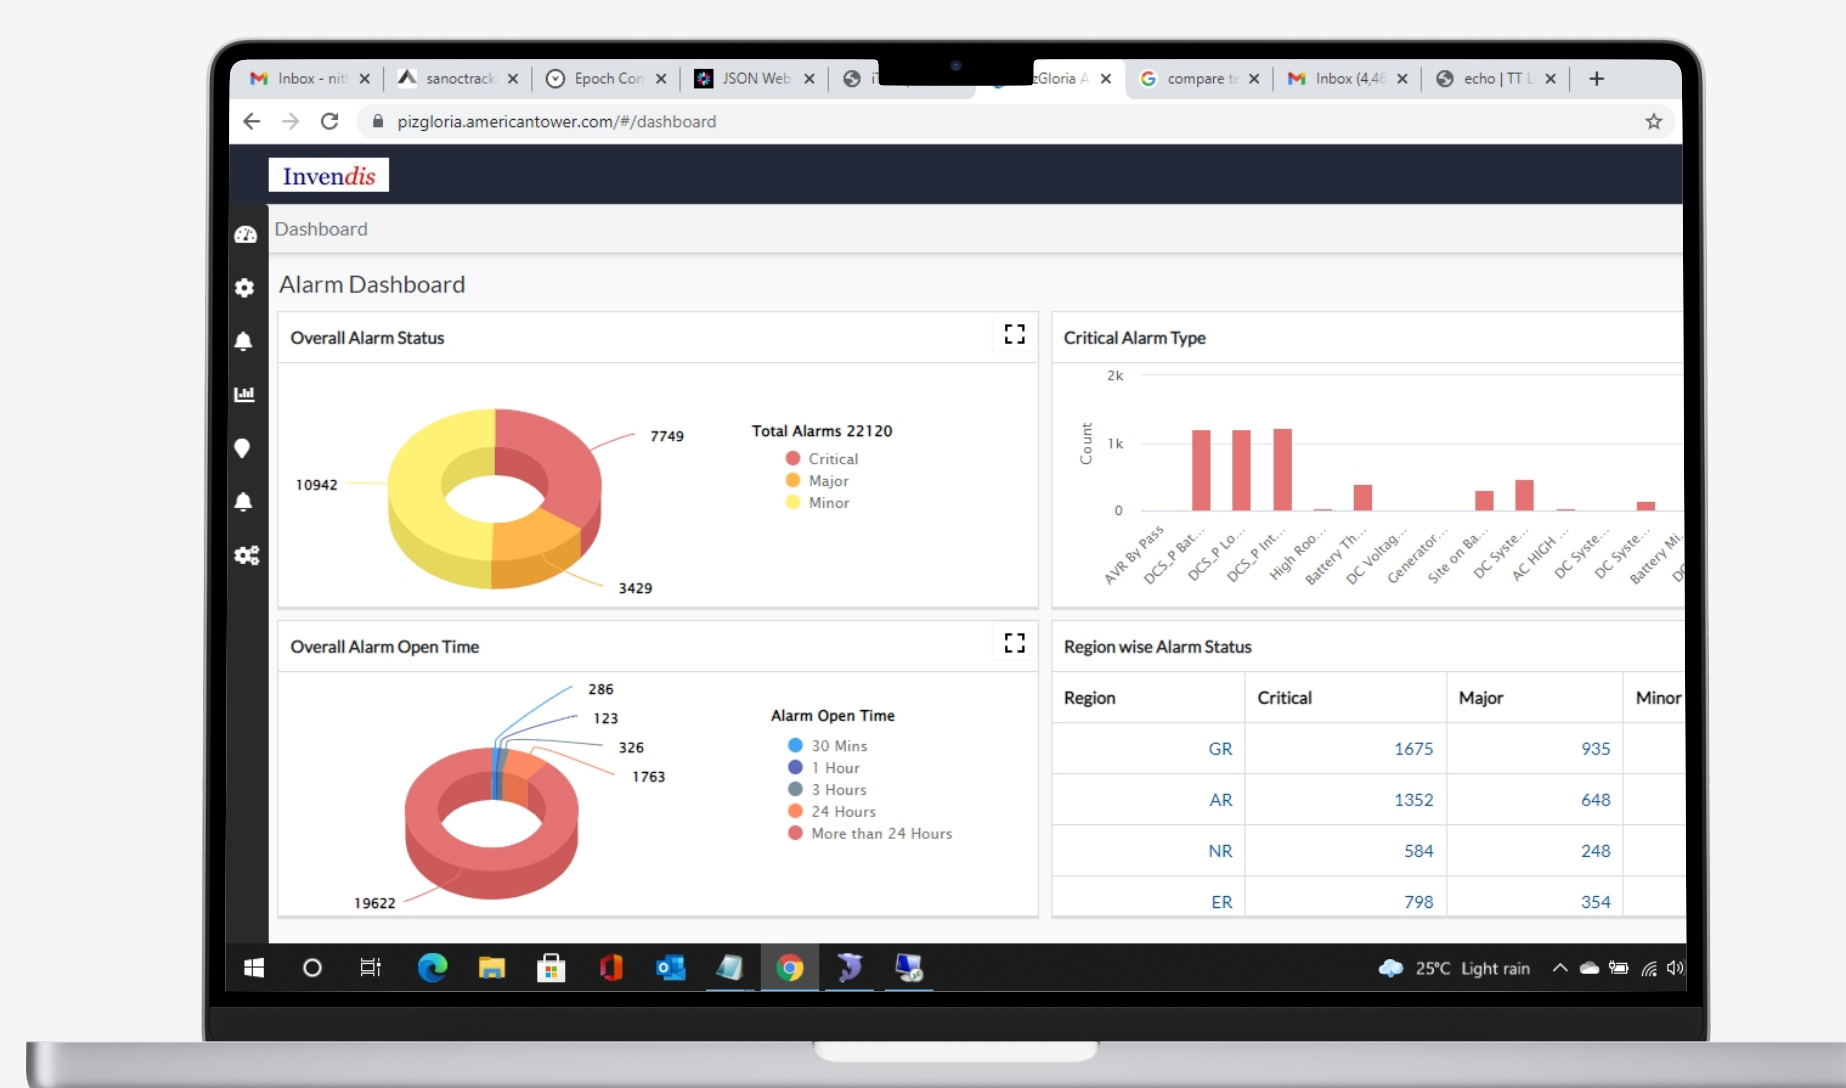

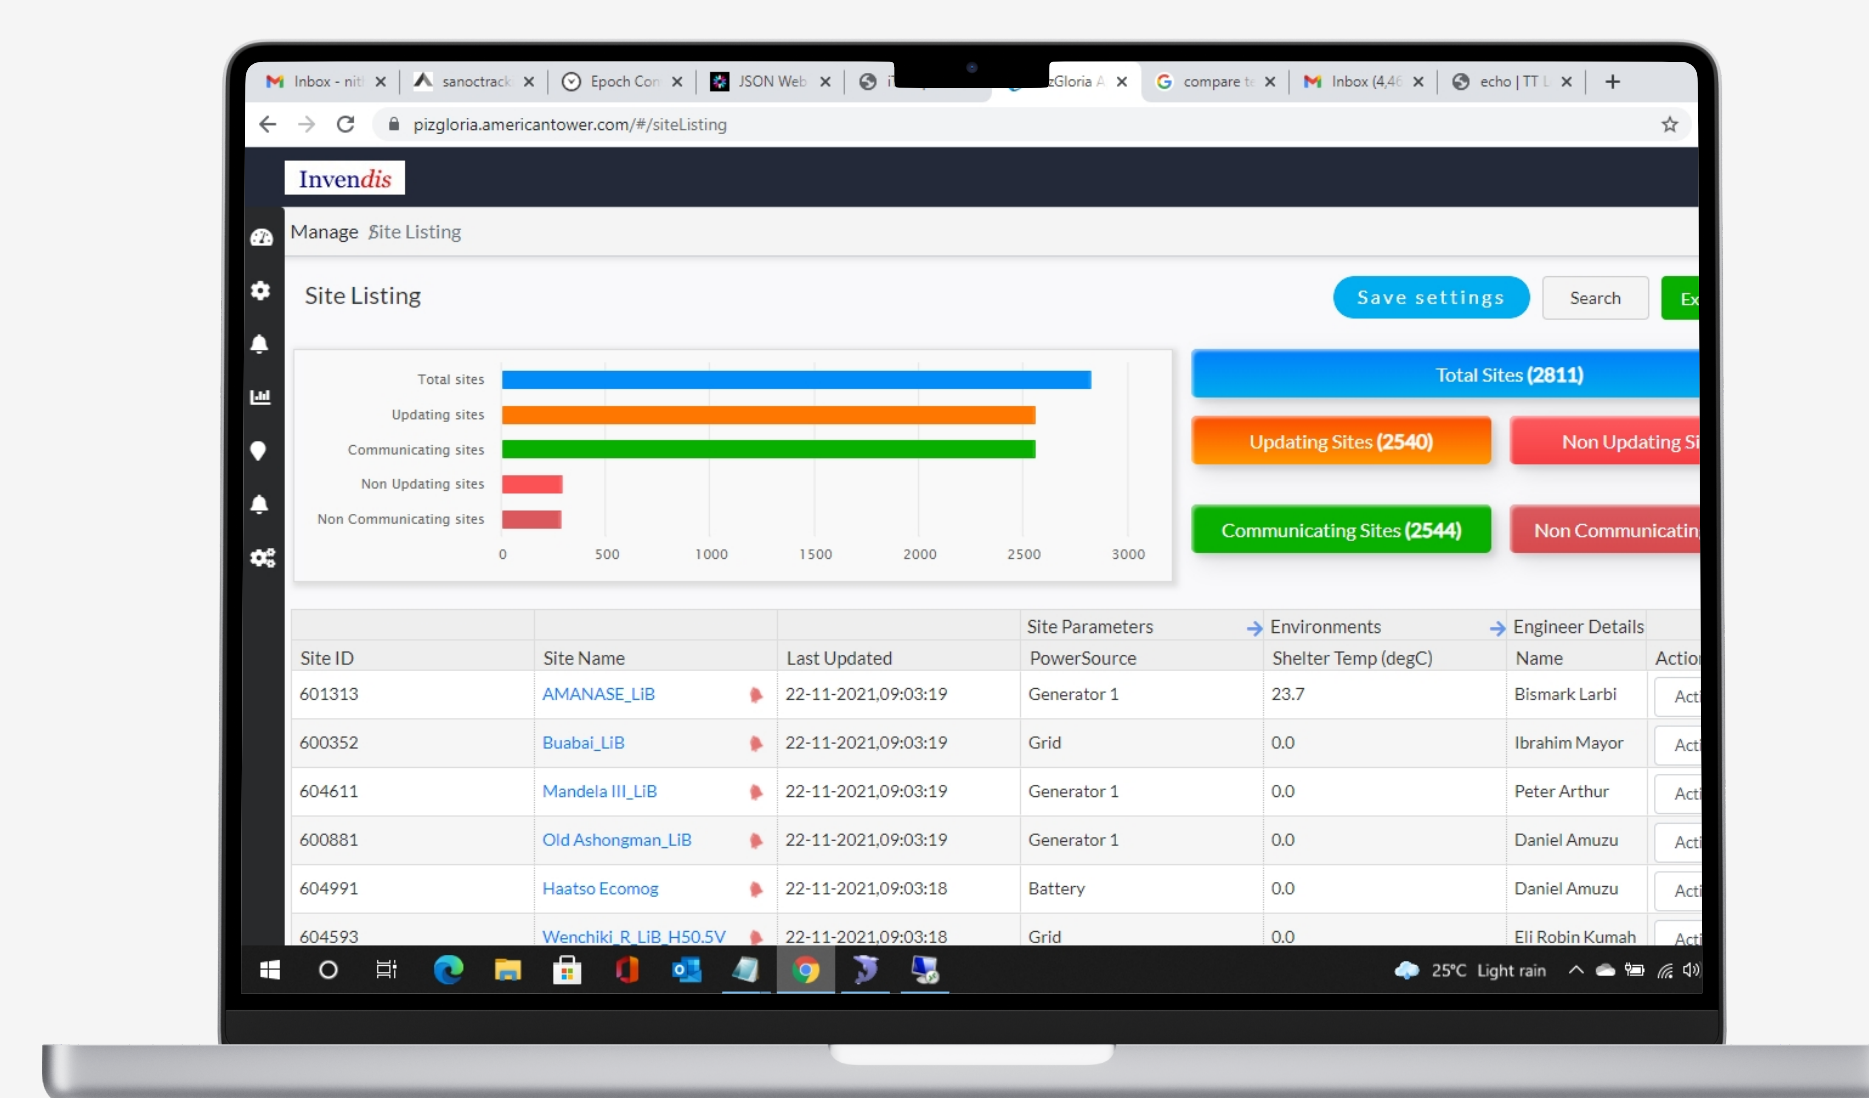

- Easy to Maintain/ Bug Fix
- Flexible and extendible, usable on the long term
- Adapt to requiremen
- Scalability: high capacity
- Responds positively to change, when adding features, performance does not degrade

Invendis offers its esteemed customers to try Piz Gloria on trial basis to explore a different flavour of monitoring solution for the telecom tower sites clubbed with compressive work force management and real time data analytics driven decision making assistance tool.

ABOUT

PizGloria is a NOC platform that provides end to end insights into telecom tower sites performance. It is an amalgamation of three distinct feature sets – Invendis RMS, iTOC & WFM. It not only brings together RMS/iTOC and WFM but also extends into real time analytics converting data sets into actionable information. It uses state of the art technology and highly intuitive user interfaces allowing the business to uncover hidden patterns, correlations, and other insights and get answers from it almost immediately”

PIZ Gloria is a complete makeover of its previous version with key focus given to user experience and response time. User will now get the best experience while they navigate from one page to other yet keeping their focus on what they are looking for. PIZ Gloria has been developed based on latest technologies like HTML5, KAFKA which comes with set of Widget based dashboard which user can call based on his wish.

What we do

Innovative products

We manufacture agnostic IoT, M2M & AI hardware & software products. Our hardware products can be installed in all weather conditions whereas our software can be deployed in VM and in all environments.

Smart & Secure sites

Our products are used to make remote site equipment smart as well as to secure them with advance alarming & notifications transmitted on near real-time basis.

Empower Field Force

We improve field force productivity with smart mobile applications and empower them with technology to directly access and control site equipment on the go.

OUR SOLUTIONS HAVE SERVICED

Telecom Towers

Solar Portfolio

Global MNO/ Tower CO

Countries

Connected Assets

Enterprise Users

Invendis designs develops and markets the most widely usable remote monitoring systems and services to global infrastructure companies to enable them to monitor, control, maintain and manage their distributed infrastructure assets efficiently

We at Invendis Technologies India Pvt. Ltd. recognizes that Information Security and assets are the responsibility of each one of us in the organization. We are committed to creating a secure ecosystem that will enable us to secure information against unauthorized changes, tampering, destruction, or loss by implementing the "Information Security Management System".
