Invent, Discover.

Cloud Applications

Invendis provides a broad array of IOT devices and Cloud based applications that facilitate advanced and smart connectivity requirements for infrastructure management services, operations automation and for power optimization .

Invendis experienced IIoT hardware and software engineers deeply understand systems integration and enhanced user experiences and create integrated IIoT solutions using state-of-the[1]art architectures, development methodologies supported by thorough testing facilities.

Innovative solutions leveraging cloud,

edge & hybrid technologies

ABOUT

Management

- Incident Management
- Corrective Maintenance
- Energy Management
- Preventive Maintenance
- Asset Management
- Change Management
- Site Access & Security Management
- Site Rental & Lease Management
- Colocation & Multi Tenancy
- Operations Management
- Document Management
- Dashboard, Reporting & Analytics
- Mobile Work Force Management

Invendis WFM solution provides Tower Enterprise Ready ticketing solution covering TT workflow, reporting, preventive maintenance and more. Platform provides flexible architecture to integrate Enterprise standard solutions to simplify workflow.In addition, Invendis WFM provides Web Services to enable an 3rd party system to integrate.

What we do

........... ••.. * * * * * * * * * * * * * * * * * * *

Innovative products

We manufacture agnostic IoT, M2M & AI hardware & software products. Our hardware products can be installed in all weather conditions whereas our software can be deployed in VM and in all environments. Smart & Secure sites

(((Q)))

 β

Our products are used to make remote site equipment smart as well as to secure them with advance alarming & notifications transmitted on near real-time basis.

Empower Field Force

 \square

We improve field force productivity with smart mobile applications and empower them with technology to directly access and control site equipment on the go.

OUR SOLUTIONS HAVE SERVICED

Invendis designs develops and markets the most widely usable remote monitoring systems and services to global infrastructure companies to enable them to monitor, control, maintain and manage their distributed We at Invendis Technologies India Pvt. Ltd. recognizes that Information Security and assets are the responsibility of each one of us in the organization. We are committed to creating a secure ecosystem that will enable us to secure information against unauthorized changes, tampering, destruction, or loss by implementing the "Information Security Management System".

infrastructure assets efficiently
